

Here you will find a description of the quality codes.

Descriptions apply to the spare parts that have been put in stock after 17.03.2023

## **Description of quality codes for metal body parts**

### **Letters describe the quality of the material**

NYO = New original part

NYU= New unoriginal part

A= Used but like new in quality

B = Used may have dents and bends but functional.

C= Rust, underlying zinc layer breaking through the paint and sealing problems

D = Hole in the material, can also be holes for original mounted sensor, locks, tow bar etc.

R = Repaired part

### **The number describes dents, flickers and bends**

1= No damage to the part

2= max 3 dents (max. 2,5cm in diameter)

3= More than 4 dents (max 2,5 cm I diameter), dents from 2.5 cm - to a maximum of 10 cm in diameter. The dents are often marked on the picture so you can see how big they are.

4 = Large dents over 10 cm, Flickering, buckling of the material. The dents and bends are often marked on the picture so you can see how much it is.

### **You then combine letters and numbers so that you can have one**

NYO1-2-3

NYU1-2-3

A1-2-3

B1-2-3-4

C2-3-4

D2-3-4

R2-3

## **Bumper and other plastic parts**

### **Letters describe the quality of the material**

NYO = New original part

NYU= New unoriginal part

A= Used but like new in quality

B = No scratches in the material, holes or cutouts other than original. May have paint damage/ or be faded.

C= Dents, deep scratches in the lacquered material, not original holes/cuts.

D = Split, cracked, needs to be glued, broken eye, deep scratches in unpainted material

R = Repaired part

### **Description of quality codes other spare parts**
